On April 22, Joe Geller of the Topsfield Linear Bike Trail received a 911 call that the wind had blown down one of the trail user operated flashing lights on Rte 1. It was repaired by the volunteers of the Topsfield Rail Trail Committee and back in operation last Friday thanks to the work of dedicated volunteers in town.

Rail Trail volunteers last weekend also installed a new kiosk with Rail Trail information at the Topsfield trail crossing at Washington Street. Workers included Comcast community volunteers.

In addition to the Topsfield kiosk, others will be installed out of town, including two in Danvers, one in Wentham and one in Peabody on Lowell Street. Geller said grants from the Essex National Heritage Commission made this possible.

A concrete base for a bicycle repair stand that was donated by the North Shore Cyclists was poured earlier this month. The stand is located south of the Topsfield Main Street crossing. Tools on the stand include an air pump and hand tools including wrenches, screwdrivers, etc. The value of the gift was more than \$1,000 Geller said.
